

One Year of Prepaid NWACA membership dues for new credit card processing clients.

Clints may be new or existing NWACA members.

Tech-Payments is a merchant services & credit card payments processor with roots originally in technical consulting. As members of both the ASA Northwest, we focus on the automotive services sector. With our underwriting specific to this sector, we can typically save our clients 30% to 50% on their credit card processing fees while providing next day funding. We also provide credit card terminals and PIN pads at no charge.

For our credit card processing clients, we provide limited complimentary technical support. We specialize in installation of business / guest WIFI solutions, failover cellular Internet connectivity, voice over IP phone systems, and hosted Exchange e-mail services using custom domains. Need a reference? We have dozens of shops from Washington to California!

Take Advantage of this Benefit Today!
