## Windows

Windows provide greater protection, weatherization and energy efficiency than ever before. We've selected high-quality local window manufacturers for greater quality and response to service concerns. We are considering one of the Pacific NW's leading window company.

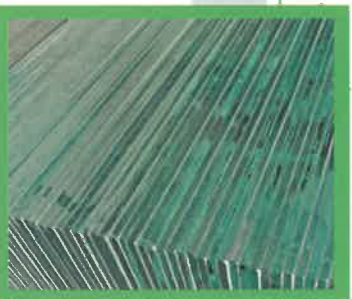

## Glass Showers

Most home owners are familiar with framed glass shower doors. Framed doors offer functionality, but frameless doors have more of a contemporary feel and accent the tile design in a shower. With so many options, we will help you choose the best options for your space.

## Custom Glass

Glass railings, glass table tops, skylights, glass shelves and more. There is not a single glass job that we haven't done. Every custom job will have unique specifications, call us to schedule an estimate or discuss your needs. We will have the best solution for you.

## Windshield Repair

The windshield has become critical in the vehicle's overall ability to protect its passengers. First of all, it is a federal safety standard that windshields keep passengers inside the car in the event of a crash. Driver safety system windshield camera recalibration available.

## Window Tint

We offer two product lines featuring carbon technology: the CXP Series and the Carbon Series. For enhanced performance demands and luxury vehicles, we recommend the CXP Series' non-metal, nano-hybrid carbon technology.

## Rock Chip Repair

Our company began in 1984 as a auto glass repair company. Although we've evolved into a window replacement and glass company, we are still a leading auto glass company in Puget Sound and work on classic cars, late model vehicles, RVs, large fleet vehicles and heavy equipment.
