

# HUNTER TRAINING

## ***Alignment Intermediate Level 2***

### **Course Description:**

**July 28-29, 2025 – Oct 13-14, 2025**

This two-day course is designed for the less experienced alignment technician or the alignment technician wanting to be updated on the latest alignment technology. Topics covered include a more in-depth study of the alignment angles, aftermarket adjustments and modified vehicles. Emphasis will be placed on OEM and aftermarket vehicle adjustment procedures found on today's passenger cars, light trucks and SUVs using SLA and strut suspensions including Twin I-Beam suspensions and "altered height" vehicles. Course consists of a combination of classroom lectures and hands-on shop training. Hands-on/Lab modules are structured to provide the student in-depth skills relating to alignment equipment operation in combination with additional opportunities to perform actual vehicle alignment processes. The amount of actual vehicle alignments will vary with each class.
