

# HUNTER TRAINING

## Introduction to Advanced Driver Assist Systems

### Course Description:

March 9-10, 2026

This course is designed for the new or less experienced technician with a desire to learn the fundamentals of Advanced Drive Assistance Systems to give technicians the information needed to learn the fundamentals as it relates to post-wheel alignment procedures and developed to instruct inexperienced technicians the proper procedures for calibrating forward facing ADAS systems such as Lane Departure Warning systems and/or Adaptive Cruise Control systems. It will also provide an overview of procedures required for calibrating lesser systems such as blind spot monitor, surround view, and rearview camera systems. Actual type and number of ADAS calibrations will vary from class to class.
